PROFESSIONAL SUMMARY

Front-End Developer with 1+ year of hands-on experience and an M.Sc. in Software Engineering, specializing in React, Next.js, TypeScript, and Tailwind CSS. Built e-commerce storefronts, admin dashboards, and REST API-driven interfaces for a real client and a product team. Experienced in component-based architecture, responsive and RTL design, automated testing with Vitest, React Testing Library, and Playwright, and performance optimization reaching a 100 Lighthouse score. Focused on clean, maintainable code and collaborative product development.

TECHNICAL SKILLS

- Front-End: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design, RTL/i18n
- State & Data: Zustand, Context API, TanStack Query, Redux, React Router, React Hook Form, Zod, REST APIs, Axios
- Styling & UI: Tailwind CSS, shadcn/ui, Bootstrap, Framer Motion, Swiper.js, Recharts, Figma to Code
- Testing & Quality: Vitest, React Testing Library, Playwright (E2E), Lighthouse, Accessibility (a11y), ESLint, Prettier
- Back-End & Databases: Node.js, Express, PHP, MySQL, PostgreSQL, JWT, Vercel Serverless Functions
- Tools: Git, GitHub, Vite, Rsbuild, Vercel, cPanel

WORK EXPERIENCE

Front-End Developer, Hamrah Tarh Pars (Ayandeh Pardazan Hivad) Oct 2025 – Feb 2026

Website builder and e-commerce theme project

Key project: Bita Shoes e-commerce theme – bita-shoes-online-shop.vercel.app

- Built a Persian RTL online shoe store theme from concept to production using HTML5, CSS3, Vanilla JavaScript, and Bootstrap 5 RTL, based on Figma designs.
- Implemented category, product detail (image gallery, size and quantity selection), and shopping cart pages with localStorage persistence.
- Rendered products, reviews, and articles from JSON data; built sliders with Swiper.js plus custom animations and SVGs.
- Developed responsive layouts for desktop, tablet, and mobile with Flexbox and Media Queries, including automatic Persian numeral conversion.
- Collaborated with the back-end team to integrate APIs and align UI behavior with server-side services.

Freelance Front-End Developer Jun 2025 – Present

Client and personal projects

PROJECTS

Author Website & Book Store (Client Project) akhavan-safaei.ir

- Designed and developed an author's official website with a blog, book store, shopping cart, and checkout for a real client.
- Chose a Next.js 16 static export architecture to fit shared cPanel hosting with no Node.js runtime, fetching live data from the API with no rebuilds.
- Built a dependency-free REST API with PHP 8 and MySQL, secured with custom JWT (HMAC-SHA256) authentication and bcrypt password hashing.
- Created a single-page admin panel to manage articles, book price and stock, order status, and site settings without page reloads.
- Implemented a persistent cart synced across browser tabs, RTL layout with the Vazir font, and SEO essentials (sitemap, robots.txt, per-page metadata).

Tech: Next.js 16, React 19, Tailwind CSS 4, PHP 8, MySQL, JWT, cPanel

The Coffee Land – Full-Stack E-Commerce & Admin Dashboard the-coffee-land.vercel.app

- Developed an RTL coffee shop storefront with React 19, React Router 7, and Tailwind CSS v4, connected to a Node.js REST API and PostgreSQL.

- Implemented product search, filtering and sorting, a cart with discount and free-shipping logic, and a checkout form validated with React Hook Form and Zod.
- Added JWT authentication, protected routes, and role-based access control (RBAC).
- Built an admin dashboard for products, inventory, orders, coupons, customers, reviews, and articles, with sales charts in Recharts.
- Designed domain-based Context API state with a centralized API layer; enforced server-side price validation and transaction-safe stock with row-level locking.
- Wrote 26 unit and component tests with Vitest and React Testing Library, catching and fixing a discount calculation bug; reached a 100 Lighthouse score via lazy loading and code splitting.

Tech: React 19, React Router 7, Tailwind CSS v4, React Hook Form, Zod, Recharts, Vitest, Node.js, PostgreSQL, JWT, Vercel

Kanban Board kanban-board-nextjs-1ta.vercel.app

- Built a Trello-style task manager with Next.js 15 (App Router) and TypeScript in strict mode.
- Implemented drag and drop between columns using the native HTML5 API with no extra library.
- Managed state with Zustand and persist middleware; built a mock API with a Route Handler, including loading skeleton, error, and retry states.
- Applied accessibility best practices: semantic HTML, labelled form fields, focus styles, and prefers-reduced-motion support.

Tech: Next.js 15, React 19, TypeScript, Zustand, Tailwind CSS v4

Project Ledger – Task & Project Tracker task-tracker-1ta.vercel.app

- Developed a task tracker with inline editing and management of dates, status, phase, and priority.
- Implemented dynamic search and filtering by project and status, with live statistics and progress calculation, animated with Framer Motion.

Tech: React 19, Vite, Tailwind CSS v4, Framer Motion

EDUCATION

M.Sc. in Software Engineering, Islamic Azad University, Isfahan (Khorasgan) Branch 2022 – 2025

Languages: Persian (Native), English (Intermediate)
