ABOUT ME

Front-End Developer with extensive practical experience in constructing scalable, responsive, and user-centric web applications utilizing React and contemporary front-end technologies.
Possesses a strong understanding of component-based architecture, state management, API integration, routing systems, and form handling.
Professional experience includes serving as a Front-End Developer at Hamrah Tarah Pars, where I successfully delivered production-ready interfaces and enhanced user experience.
Currently dedicated to mastering Next.js, TypeScript, and advanced React patterns to create even more scalable and high-performing applications.

WORK EXPERIENCE

Hamrah Tarah Pars — Front-End Developer

- November 2025 – February 2026Converted Figma designs into fully responsive and production-ready web interfaces
- Developed pixel-perfect UI implementations using JavaScript, Bootstrap, and jQuery
- Collaborated with the team to implement design requirements and improve usability
- Improved browser compatibility, responsiveness, and front-end performance
- Built reusable and maintainable UI components based on design systems

SKILLS

- **Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), React
- **State Management:** Redux Toolkit
- **Routing:** React Router
- **API Handling:** Axios
- **Forms Management:** React Hook Form
- **Styling Frameworks:** Tailwind CSS, Bootstrap, Sass
- **Build Tools:** Vite
- **Version Control:** Git, GitHub
- **UI/UX Design Tools:** Figma, Adobe XD
- **Currently Learning:** Next.js, TypeScript

PROJECTS

My Portfolio

- A contemporary developer portfolio designed to showcase my technical skills and projects.
  - Developed using React with reusable components.
  - Created responsive layouts for projects and skills.
  - Enhanced personal branding for online visibility.
  - Optimized for accessibility by recruiters.
- Live Demo:
- https://yekta-akhavan.vercel.app/

Author Portfolio

- A custom-built portfolio website designed for an author.
  - Developed responsive pages from the ground up.
  - Organized sections for book showcases, author biography, and contact information.
  - Optimized for semantic HTML and enhanced performance.
  - Implemented a fully customized user interface based on specific design requirements.
- Live Demo:
- https://akhavan-safaei.ir/

Coffee Land (In Progress)

- A scalable e-commerce platform for coffee, emphasizing reusable architecture and a modern user experience.
- Developed product listing, filtering, and product detail pages.
- Implemented cart state management utilizing Redux Toolkit.
- Integrated API calls using Axios.
- Established dynamic routing with React Router.
- Designed a reusable UI architecture to enhance scalability.
- Optimized project structure with Vite.
